

Curriculum Vitae – Shortened Version

Name: Zulfazriawan

Email: [your email]

Profile:

Backend-focused engineer with experience in Django, DRF, and full-stack projects. Skilled in designing APIs, building modular systems, and integrating external services.

Core Skills:

- Python, Django, Django Rest Framework
- REST API design, SQLite/PostgreSQL
- Async processing, background jobs
- System design, modular architectures
- Git, Docker, Linux

Experience:

- Developed modular backend system with Django Rest Framework for role-based access.
- Built APIs for data management and integrated with third-party services.
- Implemented async job handling and improved error resilience in production systems.
- Created end-to-end applications including database schema, API endpoints, and user access controls.

Projects:

- Mini project: Backend service integrating LLM evaluation (OpenRouter).
- Personal projects involving automation scripts, system monitoring, and API integration.

Education:

Bachelor's Degree (details omitted for brevity).
